## Software Engineer

### INTRODUCTION/SKILLS

I am an aspiring software developer with a wide variety of intern experience and non-professional practice. I am coming out of an experience gap, but strive to meet and exceed previous successes.

### INTERNSHIPS

- 06/20 – 08/20 **Software Engineering Intern** Red Hat  
Assisted in web API upgrades to the Ceph Dashboard  
Python / CherryPy
- 07/18 – 01/19 **Software Engineering and Testing Co-Op** Draper  
Aided in guidance and navigation flight software development by creating tools for hardware and software engineers to test various software and hardware components to comply with strict CRS2 contract requirements (For ISS Resupply)  
C / VxWorks / Python / Sockets
- 2018 – 2019 **Lab tech** ECG Lab, Umass Lowell  
part time  
Aided in CS education research by maintaining and upgrading systems in use at the ECG lab, including the iSense web service and it's associated appinventor plugin  
Ruby on Rails / Linux / AWS / Java (Android)

### EXTRA-CIRRICULARS

- 2021-2022 **Projects in GameDev**  
I filled this gap year up with a bunch of projects in order to teach myself low level graphics programming, none of which are localized to a single project I can show, but include the following:
- Development of various entity systems interacting with SDL
  - Playing with libplacebo (C rendering framework for MPV)
  - Completion of the Vulkan Tutorial
- C++ / Zig / glsl / Vulkan
- 2019 – 2020 **Fedora on Raspberry Pi**  
Worked on supplying a sane environment for students using Fedora on the Raspberry Pi, which turned into a larger initiative within RedHat  
C / Shell Scripting / Linux Userspace
- 2019 – 2020 **CCDC**  
Worked in a fast paced environment in order to propel our school's ccdc team into the NECCDC regional  
Shell Scripting / Linux Defensive SecOps

### EDUCATION

- 2017 – 2020 **Coursework towards Bachelor's** University of Massachusetts Lowell  
Learned basics, Comp I – IV, OS, Architecture, etc.  
Have 82 Credits toward degree, no current plans on completion
